

YEAR GROUP: Nursery

TERM: Autumn 1

TEACHERS: Mr Tutin and Miss Tustian

Montpelier Primary School

Communication, Language & Literacy

We start each session by saying "Good Morning / Afternoon", singing songs and rhymes and talking about our weekend or daily experiences. We practise taking turns in conversations, listening to others and building our self confidence to speak in front of a familiar group. Snack times are spent in small groups. This is a relaxed, social time for us to talk together.

During the Nursery session, we benefit greatly from adult support across the activities where we are encouraged to use a developing range of vocabulary.

Pre-reading skills are developed across the curriculum in activities such as matching games, sound games, listening to and enjoying a range of stories and learning rhymes and songs.

We are encouraged to use a wide range of writing tools which are available in both the indoor and outdoor environment. We are taught how to hold writing tools correctly and develop good habits. The children's hand eye coordination is developed through construction and throwing and catching activities.

We can take home a library book each week which must be returned for a new book to be issued.

All about me!

Building Learning Power

Our learning muscles will be stretched this term as we focus on being **Noticing Newts** as we notice things around our new classroom and school environment.

Noticing

Be a Noticing Newt

Mathematics

1, 2, 3, 4, 5 once I caught a fish alive! Through the use of songs, we will familiarise ourselves with number names and develop counting skills.

Our mathematical understanding is developed through practical activities both through indoor and outdoor activities. This half term there is a strong focus on shape names, counting to 10 and matching quantity to number names.

Expressive Arts & Design

Imaginative play takes place daily in Nursery through a variety of play situations, but particularly in the role play area. This half term our role play area will be a home, where all children can draw upon their own experiences of this environment to act out stories. We will experiment with colour and materials through painting, printing, junk modelling and cutting and sticking. The music area is available throughout the session and we encourage the children to use the instruments and explore the different sounds they make and to listen to music from around the world.

BASICS & Characteristics of Learning

This half term we will be focussing on following two characteristics:

- Playing and Exploring - using sense to explore the world around them.
- Active Learning - bouncing back after difficulties

Personal, Social &

Emotional

Time will be spent to establish the rules and routines in Nursery which will enhance our sense of security in our new environment. Positive relationships are modelled to us through our class teddy during circle times. We are encouraged to make positive friendships with other children.

Physical Development

We encourage the children's efforts to manage their personal needs (toileting), putting on and taking off their own coat and talking about the importance of hand washing.

We have access to the outdoor environment to enjoy daily energetic play and develop gross motor skills. Using a range of large and small equipment. We enjoy a range of malleable activities that will help to strengthen finger and hand muscles.

Understanding the World

We will talk about ourselves, our families and share stories from home. We are all special and unique!

As the weather will be changing slowly we will also start learning more about Autumn. We will look at the changes in our environment.
